FastRAG v3.0 - Quick Start Guide

Getting Started with FastRAG v3.0

1. Installation
   - Install Python dependencies: pip install -r requirements.txt
   - Install Ollama: https://ollama.ai
   - Pull models: ollama pull llama3 && ollama pull llava

2. Setup
   - Copy .env.example to .env
   - Configure your settings (optional)
   - Create a data directory with your documents

3. Running
   - Start Ollama: ollama serve
   - Launch the app: streamlit run app.py
   - Navigate to http://localhost:8501

4. Usage
   - Go to "Manage RAG" tab
   - Click "Feed RAG" to index your documents
   - Switch to "Chat" tab
   - Start asking questions!

5. Advanced Features
   - Upload images for multimodal analysis
   - Ask follow-up questions using conversation history
   - Inspect sources to see which chunks were used
   - Supports PDF, DOCX, TXT, and MD files

For more information, check the documentation in the Help tab.
